

Untangle Combs Stainless-steel pins

Designed to remove tangles and mats. Two rows of tapered spring tempered stainless steel teeth set into handle for the removal of stubborn, troublesome snarls. Quality features include a comfortable, easy-to-grip handle, curved, narrow alignment of teeth for hard-to-reach areas.

COMBS

These pins are thickened for dealing with tough mats.

Item NO.	Description	LxWxD (cm)	Teeth Lng. (cm)
1	23EC11DA V-type 2-row pins (11+11 pins)	16.8x6.0x5.5	2.4
2	23ED32TA 3-row pins (11+10+11 pins)	15.6x6.2x5.5	2.4

Undercoat Rakes

Rake combs are specifically designed to remove mats in long and curly coats. These tools break up matted hair with angled teeth and work best in conjunction with a spray or liquid detangling product. Remove undercoat and reduce shedding with these ergonomically designed tools. Non-slip handle with T-shape design greatly reduces strain and fatigue on the hand and wrist. Electro-coating pins glide smoothly through the coat. Double row undercoat rake works great on double-coated breeds.

* paw-print handle

Item NO.	Description	LxWxD (cm)	Teeth Lng. (cm)
1	15DAE13SB 13 short teeth	16.5x9.0x4.0	1.5
2	15DAE13LB 13 long teeth	16.5x9.0x4.0	2.0
