

Stripper Knives

Stripper knives remove dead hair and trim the undercoat and can be used for brushing show coats. 31- and 40-teeth stripper knives are ideal for heavy-duty jobs. Use 25- and 33-teeth stripper knives to remove more hair. Use 19-, 20- and 21-teeth stripper knives to remove less hair. A 28 extra short teeth stripper knife creates a finished look on ears, chest, tail, neck, back and face.

* Rosewood Handle
